

Pakistani Creative Collective — Final Build Handoff

Live site: <https://pakistani-creative-collective.vercel.app> **Date:** July 18, 2026

This is the wrap-up of the July feedback round. Everything from the "PCC Website Workflow" notes doc has been implemented, the full site has been QA-tested end-to-end (including a real Stripe checkout against your Stripe account), and this document walks through the finished product page by page.

Demo logins (seeded, no setup needed) — password **password123** for all three:

Account	Purpose
free@demo.test	The free/preview experience — locked profiles, upgrade prompts
paid@demo.test	The full member experience — full profiles, contact requests, Community Dashboard
admin@demo.test	The admin panel — applications, contact requests, moderation, analytics

All creatives, posts, and applications currently in the site are **sample data** for review. Real member data comes in after your sign-off (see "Moving to real data" at the end).

What was implemented from your feedback

Branding

- Header logo is the horizontal lockup with green text (white-text variant on dark backgrounds); the site icon is the no-text logo mark.
- All headings now use **Playfair Display SC** (replacing the earlier Garet substitute), with DM Sans for body text.

Home page

- "Five Experience Tiers" breakdown with the full criteria for each level, pulled from your "identify your level" reference.
- "Free vs. Member Access" comparison table with the "Why the Difference" note, word for word from your doc.
- A featured-profile demo card underneath (currently Aneesa's profile, as suggested).
- The "Looking to hire Pakistani creative talent?" call-to-action now goes to the talent request form, not the directory.

Directory

- Search bar plus role/location/level filters for free visitors; paid members additionally get mediums, availability, languages, and project-type filters.

Profiles

- Bio capped at 200 words (the application form enforces this too).
- Public (free) profile view no longer shows the creative's link, and no longer shows the initials placeholder where a headshot would be — free views simply have no headshot slot.
- Profile pages print cleanly (backgrounds and buttons are stripped when printing).

Application form

- Role and medium checklists now match the Jotform exactly, organized by the same categories.
- The "public link" section was removed; rate range offers currency options (USD, PKR, GBP, EUR, CAD, AUD, other); languages include Gujarati plus a fill-in-the-blank for others.
- "How did you hear about PCC?" now reveals the referral-name field right where it belongs when "Word of Mouth/Referral" is selected.
- The submission bug you hit ("it cleared everything and then gave a message") is fixed — the form keeps everything you typed if validation fails.

Community Dashboard (the full spec from your doc)

- Paid members post under the four categories (Recent Work, Seeking Funding, Seeking Collaborators, Available for Work) with title, body (500-word cap), region, duration/deadline, and an optional link.
- Posts are held for your review before going live; approving/rejecting notifies the member (no reason required). Available-for-Work and Seeking-Collaborators posts auto-expire when their deadline passes.
- Reactions (Congratulations 🎉, Interested 👁️, Support 🙌, Sharing This 🔄) and comments, with commenter name/role pulled from their profile. Comments go live immediately with report-and-remove moderation; members with repeated removals can be flagged or suspended from commenting.
- Admin controls: pending queue, edit-before-approve, remove any live post, set/override expiry dates, and a queue searchable by member, category, region, and date. Bulk "high-priority post" notifications to members are supported.
- Analytics: posts by category/month, approval rate, average review time, active posts, comment and report counts, report-to-removal rate, most-reacted and most-commented posts, and members with the most removed comments.

Subscriptions

- One membership, two billing options, presented as a single card with a monthly/yearly toggle: **\$7.99/month** or **\$80/year** (matching the two products in your Stripe account).
- Stripe Checkout, the customer billing portal, and the subscription webhook are **connected to your Stripe account and verified working end-to-end** — a test subscription was purchased with Stripe's test card, the account was upgraded automatically, and the billing portal loads with the correct plan and invoice history.
- Membership changes now apply to a signed-in member's session immediately — no sign-out/sign-in needed after subscribing.

Email (Resend)

- Your API key is configured. Every flow sends automatically: application received (to you + the applicant), approval/rejection, contact-request alerts, Community post decisions, comment-removal notices, and featured-creative notifications.
- Emails send from `noreply@aneesataalks.com` — if `aneesataalks.com` isn't verified in your Resend dashboard yet, that must be completed before messages deliver reliably.

DIRECTOR, WRITER, & PRODUCER

ESTABLISHED CREATIVE

BIOGRAPHY

Aneesa Khan is a Pakistani-American filmmaker, producer, and writer who has worked in film and television since age 15. A Northwestern University alumna, she has held roles at HUM TV, Blumhouse Productions, and Women in Entertainment, working across Pakistan, Qatar, Canada, the UK, and the US. Her debut film, *The Girl With Anklets*, won Best Cinematography at the Pakistani Film Festival Australia 2021. She went on to write, direct, and produce *Criteria Kya Hai?*, which screened at ten festivals in 2024, and served as associate producer on *Mirrors*, starring Deepti Gupta (*The Pitt*) and Academy Award nominee Paul Raci (*Sound of Metal*). In 2025, she founded Aneesa Talks, a film and media consulting company, and is currently producing her first feature, *The Hermit*. Her work is dedicated to amplifying underrepresented voices and building production environments where creative teams feel safe, respected, and represented.

Apply to Join

The full application form matching the Jotform: basic info, bio (200-word cap with live counter), role/medium checklists by category, experience and portfolio, work samples, rates, availability, languages, collaboration preferences, and consent.

APPLY TO JOIN PCC

All applications are reviewed manually by Aneesa Talks. Being listed is free.

This form takes approximately 10–15 minutes. Have your portfolio URL, professional bio (200 words max), and three references ready.

BASIC INFORMATION

How did you hear about PCC?

Hire Talent

The public talent-request form for productions looking to hire from the collective.

LOOKING TO HIRE PAKISTANI CREATIVE TALENT?

The Pakistani Creative Collective connects you with vetted creatives across film, music, and media. Every contact request is screened by Aneesa Talks before it reaches the creative — so you get a curated introduction, not a cold outreach.

1

Browse the Directory

Search vetted Pakistani creatives in film, music, and media by role, location, medium, and more.

2

Submit a Contact Request

Found someone? Submit a contact request from their profile — tell us about your project and what you're looking for.

3

We Facilitate the Introduction

Aneesa Talks reviews every request and forwards it to the creative. If they're interested, we make the connection.

READY TO FIND YOUR CREATIVE?

Browse the full directory of vetted Pakistani talent. Full profiles, search, and contact requests require a subscription.

AVAILABLE FOR WORK

Jul 9, 2026

OPEN FOR SCORING WORK THROUGH Q1

Sara Ahmed · Composer

I have a few open slots for documentary and narrative scoring work over the next few months. Based in London but happy to work remotely with international crews.

London / Remote · Through Oct 9, 2026

0 comments

RECENT WORK

Jul 9, 2026

WRAPPED MY FIRST FEATURE AS DP

Zain Malik · Director of Photography

Just wrapped principal photography on an indie feature shot across Lahore and Karachi. Huge learning experience working with a mostly local crew — excited to share the trailer once it's cut together.

QA summary (July 18, 2026)

Every user flow was exercised end-to-end this round:

- **Application** — submitted, approved, and rejected test applications; verified emails fired and approved profiles appear in the directory.
- **Stripe** — a real test-mode checkout was completed against your Stripe account: correct product/pricing on Stripe's page, redirect back to the success page, webhook received and verified, account upgraded automatically, billing portal correct. (Two configuration issues were found and fixed along the way: an invalid API key and a mismatched webhook signing secret.)
- **Contact requests, Community posting/reactions/comments, admin moderation, analytics** — all verified working.
- **Automated tests** — 56 tests across 9 suites, all passing.

Going fully live — the remaining checklist

The site currently runs against Stripe's **sandbox** (test) mode — real cards are never charged. To accept real payments:

1. **Domain** — purchase/choose the real domain and point it at the deployment (we handle DNS with you). This also becomes the sending domain for email.
2. **Stripe live mode** — recreate the two prices (\$7.99/month, \$80/year) in live mode, add a live webhook endpoint for `customer.subscription.created/updated/deleted` pointing at `https://<your-domain>/api/webhooks/stripe`, and swap the four Stripe environment variables (`STRIPE_SECRET_KEY`, `STRIPE_PRICE_MONTHLY`, `STRIPE_PRICE_ANNUAL`, `STRIPE_WEBHOOK_SECRET`) to their live values.

3. **Resend** — verify `aneesataalks.com` in Resend (DNS records) so email delivers from `noreply@aneesataalks.com` .
4. **Real data** — once you sign off on the design and flows: import the member list from your sheet, pre-create accounts for existing members, and optionally send the "your profile is live" outreach email (we can draft it together).

Environment variables reference

Variable	Purpose
<code>DATABASE_URL</code>	Supabase Postgres — use the pooler connection string
<code>SESSION_SECRET</code>	Random 32+ char string signing login sessions
<code>NEXT_PUBLIC_APP_URL</code>	The site's public URL (used in emails and Stripe redirects)
<code>STRIPE_SECRET_KEY</code>	Stripe API key (currently sandbox)
<code>STRIPE_PRICE_MONTHLY</code> / <code>STRIPE_PRICE_ANNUAL</code>	The two Stripe Price IDs
<code>STRIPE_WEBHOOK_SECRET</code>	Signing secret of the Stripe webhook endpoint
<code>RESEND_API_KEY</code>	Resend transactional email

Costs

No implementation charge to Cosmic Ventures. Hosting (Vercel) plus database (Supabase) currently run about **\$20/month** combined and may increase with traffic and storage. Stripe charges its standard per-transaction fees; Resend's free tier covers current volumes.
